How can I make my paper open access?

98% of articles submitted to Research Repository UCD were approved by publishers.

**Green Open Access**

Submit your paper to a traditional non-OA, subscription-based journal

After peer-review and acceptance keep your final post peer-reviewed version and upload it to an Open Access repository e.g. Research Repository UCD [researchrepository.ucd.ie]

Research Repository UCD will undertake copyright checking and will link this version to the published version of your article

Green OA is free for authors and free for those accessing articles in an Open Access repository (discoverable via Google / Google Scholar)

**Gold Open Access**

Select a Gold OA journal from the Directory of Open Access Journals [doaj.org]

Following submission your article will go through the peer-review process

If accepted you may be asked to pay an Article Processing Charge (APC)

Gold OA may incur a charge for authors but is free for those accessing articles on the journal website
