Bibliometrics Support

Support for individual researchers

With our professional and confidential services we can help find citation metrics that might be required for:

- Promotions / job applications
- Funding applications
- Reporting at School or institute level
- Helping inform your publication strategy

To learn more:

- Make an appointment for an individual consultation
- Find information on our Bibliometrics LibGuide libguides.ucd.ie/bibliometrics
- Attend one of our Researcher Workshops ucd.libcal.com/events

Support for research groups, schools or institutes

We can help find citation metrics that might be required for:

- Quality reviews
- Funding applications
- Accreditation
- Reporting at College or institutional level

To learn more:

- Organise a discipline-tailored workshop for your research staff and students
- Organise training for research administrators in the use of the relevant tools
- Find information on our Bibliometrics LibGuide libguides.ucd.ie/bibliometrics

ORCID support

ORCID, the persistent digital identifier for researchers, is being adopted by more and more publishers, research organisations, funders and institutions.

ORCID aims to solve the name ambiguity problem and allows system-to-system communication, reducing the need to re-enter the same data.

UCD Library supports the implementation of ORCID IDs in researchers’ workflows and provides information through:

- Presentations and consultations
- Promotion of ORCID within the research community
- Our ORCID LibGuide libguides.ucd.ie/orcid

Metrics we can provide

- Number of citations
- Average number of citations per publication
- Field-weighted citation impact
- H-Index
- Journal metrics (e.g. Journal Impact Factor)
- Collaboration metrics
- Benchmarking with peer institutions
- Altmetrics

Tools we use to generate metrics

- Scopus / SciVal
- Web of Science
- Essential Science Indicators
- Journal Citation Reports
- SCImago
- Google Scholar
