ORCID is a registry of unique identifiers for researchers and scholars that is open, non-proprietary, transparent, mobile and community-based. ORCID provides a persistent digital identifier that distinguishes you from every other contributor and supports automated linkages among all your professional activities.

ORCID helps you to:

- Ensure your work is discoverable and connected to you throughout your career
- Eliminate name ambiguity, distinguishing you from other researchers and ensuring proper attribution
- Save time by associating your existing IDs (such as Researcher ID) with ORCID and exchanging profile and/or publication data between them

“How can I ensure I receive credit and recognition for all of my contributions? Shouldn’t there be a way to reduce time spent on administrative and reporting requirements? How can I maintain control over my own record of contributions?”

http://libguides.ucd.ie/orcid
“ORCID is about disambiguating your research from others’ with the same or similar names. Without disambiguation we will continue to manually weed our bibliographies. We have better things to do with our time.”

Marc Greenberg, Professor of Slavic Languages & Literatures, University of Kansas

“For researchers there is always the problem of having to update their information in multiple places ... My hope is that one day they’ll be able to put that information into ORCID and then it will get pulled into the right places.”

Rosa Scoble, Deputy Director Planning (Research), Brunel University

Go to https://orcid.org/register
Fill in the required fields
Select your privacy settings (you can change them later)
Accept Terms of Use (you might want to read them)
Done!

You will be provided with a 16-digit number, expressed as a URL. This is your ORCID ID. You can add more information about yourself including publications to your profile. This step is optional.
